# Power

Power, an unprecedented collection of electrification products from OE Electrics. We have worked with OE to select the best products that, when combined with our ergonomic workplace accessories, are a high-quality addition to any workplace.

## Charged through the day

OE is the market leader in the UK and has a great edge when it comes to design, quality and durability. Every product is tested thoroughly and meets strict requirements.

**dataflex**

### Highest possible quality

OE electrification products meet the highest possible quality standards and European regulations. Every pin on every socket is 100% tested before delivery. Developed and manufactured in the UK. In addition, like Dataflex, OE is ISO 9001 and 14001 certified.

### Futureproof

We believe in sustainable product solutions. So does OE. All of the products from OE are already the best, most powerful in the market. But did you know that they are also modular, interchangeable, easy to repair but also upgradeable, provided you have different needs in the future.

### Timeless and contemporary design

Not just any product, but beautifully designed contemporary items that fit seamlessly with Dataflex's design language. No wonder OE products, like ours, have won several awards.
