Viewlite Plus: Designed for tomorrow's change

Little over a decade ago, flexible working, BYOD and clean desk policies were just trending ideas. Today, they are common practice and have drastically changed the requirements of workstations. Because people come in different shapes and sizes, it's essential that a single workstation is now adjustable enough to accommodate them all. The same can be said for the devices we work on. Desktop computers have been supplemented with notebooks, tablets and smartphones to enable people work at any time, from any place.

We designed the Viewlite Plus monitor arm to be able to adapt to tomorrow's change.

It is your answer to a world that never stands still. Besides supporting practically every monitor, it can be expanded with optional mounts for a dual arm and notebooks or tablets too. The Viewlite Plus monitor arm contributes to a healthier, happier and more productive workplace by making it easy to adjust and set whatever device you are using, to the position that is best for you.

The Viewlite Plus monitor arms many top design honours include a Red Dot and IF award and it's designed to minimise environmental impact. Behind the elegant, minimalist look & feel lies a sophisticated design that combines superb ergonomics with strength, durability, attention to detail and excellent green credentials.

Integrated cable management

Expandable to dual screen version
